

H07RNH6-F Rubber Flatform Cable - TPR - 1.5mm² to 70mm²

Description

Rubber flatform cables are generally used on moving mechanical machinery such as overhead cranes and hoisting systems and are often found in festoon lighting. The cable is suitable for use in dry, humid and wet conditions. To harmonised code - H07RNH6-F

Key Features

Voltage Rating 450/750 Volts

Minimum Bending Radius 8 x Overall Diameter

Oils, Greases and Chemicals Resistant

Flame Retardancy IEC/EN 60332-1-2

Temperature Limits

Temperature Range: -35°C to + 65°C

Core Colours

Standards

- BS EN/IEC 60228
- BS EN/IEC 60332-1-2
- BS EN 50525-2-21
- BS EN 60811-2-1
- Conforms to H07RNH6-F

Construction

- Conductor: Flexible Plain Copper Conductors
- Insulation: Thermoplastic Rubber (TPR)
- Sheath: Thermoplastic Rubber (TPR)

QA Lab

Cleveland Cable Test & Training Lab

Our state-of-the-art cable testing facility ensures that every cable meets the highest standards of quality and compliance through continuous, rigorous testing. Where applicable, cables are independently tested and certified by BASEC to ensure full compliance.

CPR

Cleveland Cable Company is committed to compliance with the Construction Products Regulation (CPR). Where applicable, all cables manufactured after 1st July 2017 have been assessed in accordance with CPR requirements, with full supporting documentation available.

Our Sustainability Commitment

We are committed to the journey to Net Zero as a business partner, an employer and a community member.

By thinking and acting sustainably, we deliver excellent customer service while reducing carbon emissions in collaboration with our customers and suppliers.

ecovadis

Cleveland Cable Company has been independently assessed by EcoVadis, a globally recognised provider of business sustainability ratings. Our score places us among the top 35% of companies evaluated worldwide, reflecting our strong commitment to environmental, social, and ethical performance
