

NF M87-202 EISF Individually and Collectively Screened, Unarmoured, PVC Instrumentation Cable

Description

NF M87-202 is a French Standard that specifies requirements for both armoured and unarmoured instrumentation cables used for interconnecting electrical circuits and transmitting communication signals within petroleum and petrochemical process plants.

NF M87-202 instrumentation cables are available in core, pair, and multi-pair constructions, with both armoured and unarmoured options. Armoured variants incorporate double steel tape armouring to provide enhanced mechanical protection and are suitable for direct burial installations. The cables feature PVC insulation and a specially formulated PVC outer sheath, providing flame retardancy as well as resistance to ultraviolet radiation, mineral oils, and hydrocarbons.

All NF M87-202 instrumentation cables are screened to ensure signal integrity, using collectively applied aluminium/polyester (Al/PET) tape. EISF and EIFA cable types are collectively and individually screened pairs

These cables are designed for safe extra-low voltage applications and are suitable for the transmission of AC and DC analogue signals. They exhibit resistance to aliphatic and aromatic hydrocarbons and are rated for a nominal voltage of 300/500 V.

Key Features

Voltage Rating
300/500 Volts

Minimum Bending Radius
10 x Overall Diameter

Flame Retardancy
BS EN/IEC 60332-1
BS EN/IEC 60332-3-24

Temperature Limits
Installation Temperature: -5°C to +50°C
Operating Temperature: -30°C +90°C

Core Colours

Pairs: White Red

Triples: White Red Blue

Quads: White Red Blue Yellow

Standards

- NF EN 60228
- NF M 87-202
- BS EN/IEC 60332-3-24
- BS EN/IEC 60332-1

Construction

- **Conductor:** Class 1 solid copper conductor
Class 2 stranded copper conductor
- **Insulation:** Polyvinyl Chloride (PVC)
- **Binder Tape:** Polyester Tape (PET) Individually Wrapped
- **Screen:** Aluminium/Polyester Tape (AL/PET) Individually Screened
- **Individual Sheath:** Polyvinyl Chloride (PVC)
- **Overall Binder Tape:** Polyester Tape (PET)
- **Overall Tape Screen:** Aluminium/Polyester Tape Screen (AL/PET)
- **Outer Sheath:** Polyvinyl Chloride (PVC)
- **Sheath Colour:** Blue

QA Lab

Cleveland Cable Test & Training Lab

Our state-of-the-art cable testing facility ensures that every cable meets the highest standards of quality and compliance through continuous, rigorous testing. Where applicable, cables are independently tested and certified by BASEC to ensure full compliance.

CPR

Cleveland Cable Company is committed to compliance with the Construction Products Regulation (CPR). Where applicable, all cables manufactured after 1st July 2017 have been assessed in accordance with CPR requirements, with full supporting documentation available.

Our Sustainability Commitment

We are committed to the journey to Net Zero as a business partner, an employer and a community member.

By thinking and acting sustainably, we deliver excellent customer service while reducing carbon emissions in collaboration with our customers and suppliers.

ecovadis

Cleveland Cable Company has been independently assessed by EcoVadis, a globally recognised provider of business sustainability ratings. Our score places us among the top 35% of companies evaluated worldwide, reflecting our strong commitment to environmental, social, and ethical performance
