

TEMPORARY POWER MADE SIMPLE

Temporary Power Leads for Events -
Indoor or outdoor

Flexible Mains Leads for the Power Industry

TAILOR-MADE POWER LEADS TO YOUR EXACT SPECIFICATION:

Any cable size, any length. We have the largest stock and range of HO7RN-F and EPR-CSP cables in the UK, including all sizes and core configurations from 1mm² up to 630mm².

Additionally, we hold the full range of braided and unbraided control flexes up to 95mm². Any of these cables can be incorporated into customised leads. All leads are available in PVC (Low Smoke Zero Halogen construction upon request).

Cleveland Cable Company are fully CPR compliant and all our cables come with CE certification and Declaration of Performance (where applicable).

- Portable Extension Leads
- Temporary Power & Generator Cables

Temporary Power Lead Expertise

Leads are prepared in our own workshop by fully trained cable experts. All assemblies are tested and certified in our in-house BSI accredited facility, guaranteeing the highest quality materials throughout.

Our huge stocks of cable mean instant availability on any special requirements, and we would normally expect to complete and despatch any order within two working days.

FITTINGS & CONNECTORS

Multicore leads can be expertly fitted with 110 volt, 240 volt or 440 volt plugs or connectors, single phase or 3 phase, 13 amp, 16 amp, 32 amp, 63 amp or 125 amp. Single core leads can be supplied pre lugged or fitted with Phase 3 Powersafe connectors (500 amp or 800 amp).

MENNEKES POWERTOP XTRA RANGE

Safe, robust and slip-proof with improved impact resistance, better protection, best grip even under adverse conditions, snow or dirt through unique rubber coating.

The plugs provide better corrosion protection in aggressive environments and at high degrees of air humidity thanks to nickel-plated contacts.

CABLE ASSEMBLY BENEFITS

- Labour cost saving – not having to pay electricians/employees to put together whilst on site, taking time away from the project at hand.
- You are getting a completed product which has already been PAT Tested and is ready to go.
- Buying a made up lead is cheaper than buying the components separately. When making an OEM product, we are not bound by Minimum Trade Discounts that apply when selling the components individually.
- Production quality – our team is dedicated to making cable power leads every day. They are very experienced in their roles within the production process. The products are checked, then double checked by the team leaders before they are tested.
