ABOUT US

Cleveland Cable Company was set up in 1978 as, and always will be a family business by brothers Alastair and Michael Powell who still play an active role in the business today.

With over 40 years of industry experience, we have grown to be the largest cable and accessory distributor in the UK, if not Europe.

From the large fleet of own vehicles, designated account managers and next day deliveries through to our £100,000,000 worth of stock and dedicated export department, we always ensure that all customers are treated with the same care and consideration.

Plot No S30212,
JAFZA South,
Dubai, UAE

DUBAI

We started trading across the UAE in 2010, shipping direct from the UK to sites across the Middle East and Africa. In response to our client's requests we formed Cleveland Cable Trading FZCO in October 2016 and opened our purpose built Dubai Branch to give our clients in the UAE and Africa a dedicated, local Company with which to do business. A company that understands the business needs of the local economy and which is staffed and managed by a local team, supported by the supply chain, purchasing power, critical operation delivery, and experience that comes from dealing with one of the largest specialist cable distributors in Europe.

We employ 29 staff at Dubai, including local management, field sales reps and cable operatives. We stock an impressive range of cables and a range of ancillary equipment valued at circa AED 50,000,000.

QUALITY ASSURANCE

Accredited to ISO 9001, Cleveland Cable Company recognises that sustained quality standards are essential in maintaining our good reputation and satisfying or exceeding customers' specified requirements.

We have a quality manual in place which provides forms, consistency, and continuity to the overall quality effort.

- All products conform to the relevant standard with cables being BASEC approved, where applicable.
- Account and Quality Managers will liaise with goods in when the company receive the goods from the manufacturer.
- Quality Manager will ensure that the goods are inspected, stored and despatched to a high standard.
- Cables are checked before cutting and despatch to ensure they're fit for purpose.
- Strict procedures are in place for the safe loading and transportation of orders.
- Customer complaints are dealt with promptly.
- Site visits can be arranged to liaise with the customers Quality Department regarding any issues or requests they may have.
- Cleveland Cable are the first company in the UK to gain accreditation to the BASEC Registered Stockist Scheme

ENVIRONMENTAL

Accredited to ISO 14001, Cleveland Cable Company recognise that we are a company whose business activity has the potential to negatively impact the environment and that the protection and preservation of the environment is an integral part of our activities.

Therefore, we have a full Environmental management system in place which provides objectives to respect and care for the environment and comply with current legislation, regulations, good industry practice, and all other applicable requirements at the aim of minimising our environmental footprint whilst maintaining the quality of our business activities.

QSHE DEPARTMENT

The Quality and Environmental Manuals are fully compliant to ISO 9001, and 14001 which is audited to UKAS standards.

Cleveland Cable Company Limited has Company Health, Safety and Environment Policy Statements and Manuals, which are periodically reviewed and re-issued in line with current regulations and practices.

The Health and Safety Manual is fully compliant to OHS 18001 standard, but the decision was made at board level to wait until the 2015 scope of OHS 18001 became a bonafide standard in its own right (ISO 45001) before seeking audited accreditation. We will be seeking accreditation in Q2 of 2020 for completion in Q3 2021 along with the Other ISO renewals

The appointed competent person for Health & Safety Management at Cleveland Cable Company is Mr Geoff Porritt, Health & Safety Manager.

Jason Hodgkinson is the QA\E Manager who is in control of all matters relating to the implementation of the quality, and environmental management systems including policy and procedure, audits, inspections, and customer complaints.

They are supported by:

- Auditors and Site Inspectors
- Administration Staff
- Lab Technicians in our in house Testing facility which is accredited to BSI Kitemark for testing of cables

Collectively they are referred to as the QHSE team which is the reference used for them throughout the QHSE manuals and in subsequent relevant documentation.

BASEC & BSI

Cleveland Cable has become the worlds first BASEC approved cable stockist which within our scope includes MV cables. This certification shows our commitment to supplying cable which has been independently tested and approved to the highest criteria in the world, meeting all independent 3rd party testing criteria and providing us with independent 3rd party certification.

As part of the accreditation process, Cleveland Cable's management systems were rigorously tested to ensure we have in place a robust and inviolable QA process. We are able to carry out extensive testing within our 'Test Centre' which is accredited to test cables to BSI Kitemark accredited standard. Within the capabilities of our BSI approved testing facility we have the ability to test MV cables up to 33KV.

By meeting the stringent assessment process, Cleveland Cable Company has become accredited under the Registered Stockist scheme, validating its internal quality programmes, procedures and traceability lines.

Cleveland Cable Company regularly undertakes quality assessments to verify cable design and electrical properties to ensure they meet the required standards. This includes in-house testing of cables held in their own stock. The company also regularly visit the overseas factories of its suppliers to undertake audits and to ensure professional quality management systems along with production line and test facilities meet the high standards required by Cleveland Cable Company and the UK market.

We put our cables through rigorous quality checks from the moment the cable arrives at our branches with visual inspections and samples taken via our sample program. The samples are then inspected and tested within our lab to confirm they meet the requirement of the standards and our high standards.

BASEC – Approved Cable
