# Supply

We have been supplying complete cable solutions to the world's most demanding industries for over 45 years. Our network of branches, our stockholding and our best-in-class customer service makes us well placed to supply the unique demands of the utilities industry.

As your industry has developed, so have we, introducing new cable ranges and technology to lead the way and help our customers reach their goals. We carry a full range of DNO-approved cables through our extensive network of trusted suppliers with whom we collaborate to ensure the best lead times, deliveries and economies of scale, all of which we pass onto you, the customer. Working so closely with our own suppliers means that you benefit from our shared knowledge and experience in supplying the right cable for the project in hand.

All of our cables are supplied to you having undergone rigorous testing and conforming to the relevant standards, and our EcoVadis Silver Sustainability Rating is testament to our commitment to ethical and sustainable practices throughout our supply chain.
