CLEVELAND CABLE COMPANY

Graduate Full Stack Web Developer

Cleveland Cable Company is the largest supplier of cables and cable accessories in the UK. Founded in 1978, we operate nine branches across the UK and Ireland supplying domestic and European markets. In 2016, we launched Dubai-based Cleveland Cable Trading FZCO to supply markets in the Middle East and Africa, taking our business truly global. Additionally, we own and operate Superlec Direct - an electrical wholesale, supplier and retail e-commerce website.

As part of our widening engagement with web and digital media, we are currently recruiting for a graduate level full stack web developer role based at our Middlesbrough head office. Working as part of the web team, successful applicants will be required to have:

- Recent, relevant degree level qualification (2:1 or higher preferred)

- Good PHP/MySQL development skills

- Skills with and knowledge of a front-end scripting language (jQuery preferred)

- HTML/CSS production skills

- Some experience with and knowledge of Adobe Suite software

- The ability to research, up-skill and cross-skill with web technologies

The role will involve:

- True full stack development – including front-end production, UI/UX development, bespoke PHP/MySQL development, and server admin

- Working within a team on larger projects, broadening into taking full ownership of development on smaller projects when settled in the role

- Co-ordinating with and implementing strategy set by SEO/PPC staff and management

Training on software and in-house tools will be provided where necessary.

Job Type: Full-time, permanent
Salary: Negotiable, based upon experience

To apply, please send your CV to jrichardson@clevelandcable.com
