

## EAY2Y 0.6/1kV Cable

### Description

EAY2Y are Power distribution cables used in power stations, industrial installations, switchgears and local mains. They are low voltage aluminium cables with PVC sheath and HDPE outer sheath most often used in the renewable energy industries. The E-AY2Y is designed for fixed installation underground, in buildings, cable ducts or in open air on tray or racking. They are suitable for use in applications under mechanical stress. The outer sheath is hardwearing, durable and provides flame retardance to IEC/EN 60332-1
