Low Voltage Aluminium Waveform Cable - National Grid (NGED) 1kV, XLPE, PVC - 95mm² to 300mm²

Description

National Grid (NGED) Approved Specification Aluminium Waveform cable which is used by Distribution Network Operators (DNOs) such as UKPN, WPD, ENW, NPG, SSE etc.

Aluminium Waveform cable is used as an energy supply cable most commonly found in power station distribution, panel boards and street lighting areas where mechanical protection is required. It consists of 3 or 4 aluminium conductors in sector shape with a copper conductor in a waveform lay.
