

NAYY-J/O Aluminium Conductor PVC PVC 0.6/1kV Cable - 6mm² to 630mm²

Description

NAYY cables are Low Voltage 0.6/1kV European aluminium conductor power distribution cables. They are an alternative to copper conductor NY cables offering both reductions in weight and in initial cost. NAYY are available with earth cores (J) or without (O). They are mostly used within the Renewable Energy industries and in particular within Solar farms.

The cables are unarmoured with aluminium cores, Polyvinyl Chloride (PVC) insulation and PVC outer sheath making them suitable for fixed installations in buildings, in free air and buried within conduit or trunking.
