

## Black IP67 Cable Glands

### Description

Our high quality, black capped PVC cable gland is designed to grip and also terminate unarmoured cables. It is waterproof, and has an ingreed protection rating of 67 (IP67), meaning it can withstand short periods of immersion in water while under pressure between 15cm and 1m. IP67 rated equipment offers significantly greater protection than equipment rated IP65 or IP66, which are both simply 'water-resistant'.

Cable glands have many benefits, and are able to facilitate grounding, insulation, bonding and mechanical stress relief. They can also seal cables that pass through bulkheads of gland plates. Cable glands are efficient in repelling contaminants, such as fluid, dirt and dust.

### Key Features

### Standards

### Construction

### QA Lab

#### Cleveland Cable Test & Training Lab

Our state-of-the-art cable testing facility ensures that every cable meets the highest standards of quality and compliance through continuous, rigorous testing. Where applicable, cables are independently tested and certified by BASEC to ensure full compliance.

### CPR

Cleveland Cable Company is committed to compliance with the Construction Products Regulation (CPR). Where applicable, all cables manufactured after 1st July 2017 have been assessed in accordance with CPR requirements, with full supporting documentation available.

### Our Sustainability Commitment

We are committed to the journey to Net Zero as a business partner, an employer and a community member.

By thinking and acting sustainably, we deliver excellent customer service while reducing carbon emissions in collaboration with our customers and suppliers.

### ecovadis

Cleveland Cable Company has been independently assessed by EcoVadis, a globally recognised provider of business sustainability ratings. Our score places us among the top 35% of companies evaluated worldwide, reflecting our strong commitment to environmental, social, and ethical performance
